Dear Channel Partner

This portion of warranty card must be filled properly as per the guidelines within 7 days of sale/fitment, whichever is earlier. It is to be handed over to company's representative or to be posted directly to company, based on which company will process necessary documentation for the initiation of warranty. Otherwise company decision would be final.

BATTERY CARE TIPS

Battery top should always be kept clean and dry. Always use a moist cotton cloth only. Never use a Woollen/Silk or Synthetic cloth, as it can create a spark.

Apply Petroleum Jelly (Vaseline) externally over the terminals and cable clamps to avoid corrosion. Never apply grease. Terminal corrosion, dirt and moisture cause loss of power and make battery weak.

 The electrolyte level should be maintained at maximum level of float indicator during installation or topping up. Use only battery grade distilled water for topping up. Do not top up with acid / electrolyte / mineral water / tap water.

The cells loose water during use. Check your battery regularly and maintain the electrolyte level within the band marks indicated.

Match charger to battery.

CAUTION

1. Keep away from sparks, cigarettes, open flame. These can cause explosions.

2. Avoid metallic contact across terminals, as this result in short circuit and sparking.

PLEASE NOTE

 As per Batteries (Management and Handling) Rules, 2001, it shall be the responsibility of the consumer to ensure that used batteries are not disposed off in any manner other than depositing with the dealer.

It is mandatory to accept used lead acid batteries for recycling, in exchange for new batterie's purchased.

3. It is illegal to discard a lead acid battery in a trash bin or give/sell to an unauthorised person.
