- Apply Pergumol daily (Monday) externally over the terminals and cable starts to avoid corrosion. Never apply grease. Terminal corrosion, dirt and moisture cause loss of power and bad battery acids.
- The electrolyte level should be maintained at maximum level of float indicator during extension or recharging. Use this battery grade distilled water for topping up. Do not top-up with acid / electrolyte / mineral water / tap water.
- The cells loose water during use. Check your battery regularly and maintain the electrolyte level within the band marks indicated.
- Match charger to battery.

1. Keep away from sparks, cigarettes, open flame. These can cause explosions.

1. As per the Battery Waste Management Rules 2001, it shall be the responsibility of the consumer to ensure that used batteries are not disposed off in any manner other than depositing with the dealer.
